From: Jackie Cummings <Jackie@clintoninvestigations.com>

To: Group R5Foia/R5/USEPA/US@EPA,

This formal request is regarding an and all records of a chlorine spill which occurred on December 28, 2012. The 300 pounds of chlorine were spilled while being transported (via Brentag Great Lakes) to Eli Lilly, Building 132, Indianapolis, Indiana. The approximate time of the spill was noon on that date. The responding HazMat team (First Priority One) arrived to find the chlorine leaking out of the truck and did not follow protocol in proceeding with the clean up. We are attempting to obtain these records to confirm the spill (well above the RQ levels) was reported to the proper authorities.

In responding to our request, a Word Document or PDF file would be greatly appreciated. Should you need additional information, please let me know and I will be happy to provide any additional details required.

Regards,

*Jackie Cummings
